YOU WILL NEED:

White & Red Fimo Clay

White Acrylic Paint

Small Paint Brush

Super Glue

Needle

Mould the red clay into a ball and then squash it flat. Push out the centre to create a shape like the pic.

Roll a short sausage shape and then press each end into a flat surface to flatten each end.

Using a needle poke small holes on the top of the base to create a hold for the glue. Do the same for the underside of the red top.

Bake your two pieces at 110C for 30mins in the oven.

Paint white dots on top. Glue your pieces together with a tiny bit of super glue.

Walah! Finished....
